PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	As per the data of 2019, there are around 24.9 thousand doctors in the whole country of Nigeria, and for a questionnaire study it might be suggested that at least 10% of the total population be covered for the study. Just a data of 100s might be bit tricky as insufficient study data or subjects when the total count is around 24.9 thousand doctors who are in active clinical practice in the country.	
Minor REVISION comments	Improvisation of language is much suggested that suits the scientific community	
Optional/General comments	Study needs more analysis and more subjects to be studied. Though the concept is very important to the present global health status	

PART 2:
