

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Chemical Sciences</a>
Manuscript Number:	Ms_AJOCS_89847
Title of the Manuscript:	What Principle Governs the Chemical Dynamic/Kinetic Process (Part-II)?
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalajocs.com/index.php/AJOCS/editorial-policy>

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The manuscript describes a continuation of a previous article of the same title where the author presents the effects of applying the "Yin and Yang" principles of ancient China philosophy to processes of reversible chemical reactions. It is not absolutely clear what this philosophical principle has to do with physics, but since there was a first part, it is justifiable to have a second one developing complementary aspects of the first.</p> <p>The English writing of the manuscript has many shortcomings and it would therefore be advisable to have the text proofread by a native English speaker so that the reading of the manuscript becomes more enjoyable.</p> <p>There are no references to articles by other authors in the area because the material appears to be the exclusive creation of the author of the manuscript.</p> <p>In section 2 there are two writing defects:</p> <ol style="list-style-type: none"><li>2. "How to express the dynamic/kinetic process graphically?"</li></ol> <p>What is the meaning of the term "rate-t" ? It needs to be clarified.</p> <p>There is a loose caption at the end of this section that should be placed just below figure 1.</p> <p>"Fig.1 clearly shows that the dynamic/kinetic process in system is not simply repeated but a little changed for each period in cycle."</p> <p>Once these corrections have been made, the manuscript can be accepted for publication.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
