PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Major revision required in methodology. Ethical clearance required. The aim of the study is not addressed in results and conclusion. How are authors evaluating the effectiveness of the diagnosis in already diagnosed tears on MRI? Age of the patients range from 51-73 years in the results where as it is 18-60 years in the methodology. Kindly justify the same. Partial meniscectomy, total meniscectomy and repair was decided on what basis? Authors need to refer more articles and write the discussion part elaborately. Many spelling and grammatical mistakes needs attention.	
Minor REVISION comments		
Optional/General comments	Good study but needs major revision.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
