

Review Form 1.6

Journal Name:	Asian Journal of Probability and Statistics
Manuscript Number:	Ms_AJPAS_78474
Title of the Manuscript:	RELATIONSHIP AMONG CONTINUOUS PROBABILITY DISTRIBUTIONS AND INTERPOLATION
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The text needs to be reviewed in the following direction:</p> <ul style="list-style-type: none"> - All equations need to be numbered and referenced properly - The goal of detailed introduction of different statistical distributions must be stated clearly, otherwise this is a well-known content and can only be referenced. - Application of interpolation need to be further stressed in order to make sure that reader understands the contribution of the paper. <p>From the text it is also not clear why there is a dedicated section 2.2. Chart and how it is related to the overall goal of the paper.</p> <p>As a general comment, I believe the paper should be restructured in a way that focuses on the novelty and application of the suggested interpolation approach.</p>	
Minor REVISION comments		
Optional/General comments
