So formatting of the paper must be done properly (as per the journal requirements)</li> <li>2. Distribution of the References is not proper. More number of references from year 2020 and 2021 must be added in the list to show what researchers have done in these recent years.</li> <li>3. Conclusion part is too small currently. Recommendations can be added in the conclusion itself.</li> <li>4. Table 7, Table 8 and Table 9 can be removes from the Conclusion section and can be added to the Results itself.</li> <li>5. Results section is displaying the number of figures and tables, but the explanation about reach of them must be added in the Results section. Just inserting number of figures/tables without explanation is not a good way of presenting the manuscript. So, this updation would be good for the overall representation of the paper.</li> <li>6. Paper can be accepted for the publication after the additions of the above-mentioned comments.</li> </ol>
