

Review Form 1.6

Journal Name:	Asian Journal of Probability and Statistics
Manuscript Number:	Ms_AJPAS_86606
Title of the Manuscript:	Study of Binary Logistic and Poisson Regression Models of Diabetic patients in Nigeria using Dichotomous and Non- Dichotomous predictors
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajpas.com/index.php/AJPAS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	The author compare Poisson and Binary logistic regression analysis by using two data sets of diabetic Patients in Nigeria known as dichotomous and non-dichotomous data. The author also state why these regression is important in the study. The author also compared non-dichotomous data by logistic regression and Poisson regression and shows that the Binary logistic regression gives smaller value of Aikaike Information Criterion than the Poisson. the work is up to mark.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
