Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1.-The selection of the type of study depends on the objectives of the research team or the research at work. I suggest you only inform the type of study carried out.</p> <p>2.-I consider it important to clarify characteristics of similarity or differences of the pregnant women who attend the centres because it is a confusing variable for the answers of results and with this, results could have the need to match variables given the differences and thus avoid that the confusing variables influence due to the weight of etiological factors of the problem to be treated in the study for example religion, age, socioeconomic level, they could be a reason to attend one or the other centre and each one constitutes a similar conglomerate between its members and different from those of another conglomerate.</p> <p>3.- The bibliography could be numbered and delimited according to its order of appearance in the text, thus facilitating its revision</p> <p>4.-We suggest updating the bibliography of 23 none often last five years -Over 20 years old 5 for 21.7 % -Over 10 years old 11 for 47.8 % -Over 5 years old 7 for 30.43 %</p>	
Minor REVISION comments		
Optional/General comments	<p>It is a health problem that must be solve and for this it must be characterized to intervention according to group to personalize the actions to be carried out and thereby achieve good results in the shortest possible time due to its negative impact on health and in this study on health of mother and fetus</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
