PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	The topic selection of the article is relatively novel, and there are not many studies in this area. The research objects of the article are all aimed at some more positive prospective fathers, but not some more negative groups, and there is no classification for women, and the negative female population has a great influence on men, and no scale calculation is carried out. The consultation content of the article is not fixed, so the conclusion of the article only represents the opinions of some people. Of course, the intention of further research can be derived from this research, and it is hoped that the above-mentioned other deficiencies can be explained in future research.	

PART 2:
