### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<ul style="list-style-type: none"><li>- Carefully check the text formatting. Several excerpts with incorrect spacing, text without justifying and sentences starting with a lowercase letter.</li><li>- In the article, change the terms "covid infection" to "infection by the SARS-CoV-2 virus". Coronavirus disease (COVID-19) is an infectious disease caused by the SARS-CoV-2 virus. For example, in the excerpt below and in the keywords: There is significant association between IgG titre and timing of of antibody testing after covid infection</li><li>- In the objectives of the study, write in text form, and not in topics.</li><li>- Add captions to figures 1 and 2.</li><li>- Adjust the formatting of tables 1 and 2. As it was done, they are tables and not tables.</li></ul>	
<b>Optional/General</b> comments	The article has an interesting theme, the results were correctly expressed and the discussion is good. However, I suggest revising the text and redoing the tables for the article to be published.
