Compulsory REVISION comments		
Minor REVISION comments	On the very basis of Silva result, author made a statement with theoretical and observational data that expansion factor of universe is a special form, which have a accelerated expansion rate.	
Optional/General comments	Under the very assumption of phantom DE model, the anisotropic universe will continue to accelerated expansion. The scale factor and cosmic time plot is giving an uncanny result in section 3, about the rate of expansion that allows to a new conception of expansion rate.
