PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. <u>Rewriting the introduction and conclusion</u> is important. The clues required for modification have been mentioned in the manuscript, carefully go through the comments and develop accordingly. 2. The figures/values provided in the text are <u>not consistent</u> with the tables. Carefully cross-check such mistakes and correct them. 3. The title of the manuscript could be modified by adding where the study took place. E.g., in Nigeria 4. The use of abbreviations in a proper manner is ignored throughout the manuscript. Remove all such redundancies. 5. Provide a clear detailed study area map for section 2, and avoid mistakes in writing the absolute location. The target audience may vary and not be familiar with the location. So, providing a map will affect the readability of readers and familiarity with the study area. 6. Provide relevant mathematical formulas to demonstrate how the measures/calculations were done. 7. Some statements need strong literary evidence to make them more effective. 	
Minor REVISION comments	<ol style="list-style-type: none"> 1. Use some very good literature outside Nigeria, e.g., China, India, South America whose groundnut production is higher. 2. Text font size is not the same throughout the text, except for headings. 3. Remove unnecessary unit values from tables. 4. Keep all values in two decimals. 5. Figure 01 is not referred to in the text. 6. Italicized all scientific names. 7. Grammar and punctuation corrections are a must. 	
Optional/General comments	Author/s has/ve done a good investigation. So, make sure to improve the paper according to the comments given. Good luck.
