PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> -The article has too many combined words which may be due to lack of prior editing. Please attend to this problem before publication. -Proofread the article again, if not done. This will clear obvious errors. -While the layout of the paper is acceptable as a protocol article it could have been better to organize it in a publishable format of the journal in question. -The key words should include Automatic Cocoa Quality Testing and Procurement System. Here consider doing away with just procurement because the thrust of the paper is on procurement system. -References: There are too many old sources of data. Strengthen this area with more recent publications 	
Minor REVISION comments	-Consider including a map of the study area for the sake of international readers.	
Optional/General comments	The protocol is generally acceptable on condition that the above issues are attended to.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>If yes, Kindly please write down the ethical issues here in details)</i>
