PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	CORRECTED TOPIC:: Empyema Thoracis caused by <i>Klebsiella Spp</i> and <i>Escherichia coli</i> Co-Infection - An Uncommon Isolation with atypical presentation In your abstract you didn't state how you came about the Empyema Thoracis, no mention on how you came about the diagnosis which is key in your case report. You also mention E.coli isolated in your abstract, you didn't mention from what sample it was isolated from I was thinking the pus sample gotten would also be used for the bacterial culture to isolate the causative organism, but you mentioned you only cultured the pleural fluid and blood sample.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
