### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	In the title, I suggest it should be factors responsible. The number of respondents above 1000 is adequate and normal. The abstract should be one paragraph and not segmented. The author used V throughout to represent Vaccine and Vaccination. I corrected them.	
<b>Minor</b> REVISION comments	In the tables, he used commas instead of Dot in the values. I painstakingly corrected them. He should first give the full meaning of any abbreviation before repeating it in the body of the work. For instance, social media (SM). He didn't italicize the journal name in the reference. But I did that for him.  HIS STATISTICAL METHODS ARE OF HIGH STANDARD AND COMMENDABLE	
<b>Optional/General</b> comments	He kept on saying in this our work. It should be in this work. Nobody is taking it away from you.	

### PART 2:
