PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In the manuscript it would be better to present data on the chemical composition of breast milk in post-treatment rats, this can support the end product of the observed enzyme activity.	
Minor REVISION comments	The author should also be able to add the chemical composition of breast milk in post-treatment rats.	
Optional/General comments	This study only measures the activity of the enzyme, it will be better if the product of the enzyme activity is added which can be in the form of the chemical composition of breast milk in post-treatment rats.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
