PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. The language needs to be improved, there are still a lot of incorrect writing 2. Abstracts and conclusions are not the results of references read, but abstracting the content, so they should be from the results mining of the author's discussion which are abstracted and concluded 3. Page 3 (written: "In an illustration few population were given a placebo and appraise that it was a induction and afterwards consuming pills enhanced the pulse rate, blood pressure and also reaction speeds became better, response rate to placebo varies according to illness [12]". it is necessary to explain the placebo for which drug, because the effect of certain drugs when replaced with a placebo, has an effect but differs from one kind of drug to another. 4. On the explanation of depression: "The researchers found that the participants reported significant decreases in depression symptoms when they took the active placebo, compared to when they took the inactive placebo [8]; it is necessary to explain what the active and inactive placebo means. 5. In the reference list: Some of the written references are incomplete; mostly old references (under 2015). Need to find new references 6. In general, the explanation is less deep, Please explored deeper that connects especially the nerves and the mind that will affect a person's psychology in receiving a drug why a placebo can have a positive or negative effect on a person 	
Minor REVISION comments		
Optional/General comments
