PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | <p>it is necessary to reconsider the use "species" throughout the text - because this term often hides a genus name (not just species)</p> <p>These are taxa unknown to me - <i>Coenagrion proparte</i> and <i>Erythromma proparte</i> I think there is a mistake - I suggest to mention only <i>Coenagrion</i> sp. and <i>Erythromma</i> sp.</p> <p>I am not a native speaker - therefore, I recommend checking the text by a native speaker</p> | |
| Minor REVISION comments | <p>minor suggestions for correction are given directly in the text</p> <p>Figure 3 is redundant</p> <p>at least a little attention could be paid to rare species (and their occurrence) in the discussion e.g. <i>Bradinopyga strachani</i> (Kirby, 1900) - IUCN category 2018-1 : Least Concern <i>Chalcolestes viridis</i> (Vander Linden, 1820) - IUCN category 2018-1 : Least Concern Etc...</p> | |
