PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The study could present the results of the questionnaires more clearly. The conclusion was a little "confused", in relation to the initial objective of the study. The manuscript should annex the questions of the questionnaire. Regarding the quantitative issue of the study, I was not able to observe an applied statistic, not even a descriptive one. I suggest improving this part of the manuscript	
Optional/General comments	review the methodology, explaining better the way of conducting the study, as well as the statistical analysis and qualitative analysis
