### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>This is a unique case of testotoxicosis with central precocious puberty. The author has done a great job in explaining the case, treatment and outcome.</p> <p>Table 1 helps to understand the anthropometric and lab values.</p> <p>The growth chart is helpful to see the response to treatment of stature, but the growth chart is not in English.</p> <p>There are a few grammatical mistakes, including extra spaces; please correct those.</p> <p>Please expand the short form VT and VP</p> <p>Please add a conclusion that describes the diagnosis and treatment with outcomes.</p> <p>Please consider changing the term control in Table 1 ( first column) to Time. The term control can be confusing and is typically used for a control group.</p> <p>Please consider adding a flow diagram of the Hypothalamic pituitary axis, which describes the mutation site. This will help to quickly understand the underlying genetic mutation.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
