Manuscript Number:	Ms_AJRRGA_85928
Title of the Manuscript:	PREVALENCE OF FUNCTIONAL DEFECATION DISORDER AMONG PATIENTS WITH FUNCTIONAL CONSTIPATION – EXPERIENCE FROM A TERTIARY CARE HOSPITAL
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajrrga.com/index.php/AJRRGA/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The objective of the study is not fully contemplated in the text of the article. The paper describes the prevalence of FDD in a group of patients with CF. This must be written in the text. I also believe that it would be more appropriate to change "clinical profile" to " clinical and epidemiological profile" The article has some methodological gaps. It was not clear how the patients were selected, the research location, or the duration of data collection.	
Minor REVISION comments	Review the results and discussion. If it's not the journal's rule, I suggest writing the results separate from the discussion Minor typos in the text	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
