Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The authors studied the prevalence of risk factors in 35 patients with NAFLD in Bangladesh. They found that well-known risk factors are prevalent in their subjects. I have some considerable concerns.</p> <p>Major comments</p> <p>#1. The method of recruitment of the subjects is not described.</p> <p>#2. There is no control cohort. So the prevalence of risk factors could not be compared between the patients with NAFLD and those without NAFLD.</p> <p>#3. The title of manuscript should be "Risk factors of non-alcoholic fatty liver diseases in Bangladesh".</p> <p>#4. The number of patients studied is 35. It is too small.</p> <p>#5. Materials and methods and Results should be described as text, but not as bullet form, nor as only figures and tables.</p> <p>#6. Figure 1 shows the same data as Table 2.</p> <p>#7. Discussion. The authors described only the findings reported by others, but not their own data.</p> <p>#8. Materials and methods. The methods for assessment of fibrosis and steatosis are not shown.</p> <p>Minor comments</p> <p>#1. P1, line 12. "February 2019" should be "February 2020".</p> <p>#2. P1, line 36. "Non-alcoholic fatty liver disease" is the 2nd or later appearance, and should be described as "NAFLD".</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
