### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajrop.com/index.php/AJRROP/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	None	
<b>Minor</b> REVISION comments	"... taking 30.7% (59 cases) of the total cases. Among the diagnosed PGs, 20.3% of the cases develop on the palpebral conjunctiva following chalazion excision and 27.2% of the cases are diagnosed on the bulbar conjunctiva, which are attributed to pterygium excision (20,3%), squint surgery (1,8%) and trauma (5,1%), while the remaining 52.5%..."	I suggest observing the use of <b>commas</b> and <b>doits</b> between numbers.
<b>Optional/General</b> comments	What antibiotic was used?	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
