Review Form 1.6

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | <p>Comment on the lines "In this case, we want to raise awareness of this etiology of cataracts, rarely encountered in ophthalmology "Comment - A single case study cannot raise awareness about disease and purpose of publication is not to do so. 2. Great questions persist as to its pathogenesis. Big questions persist as to its pathogenesis. Comment - Vague and repetitive statement 3. The ophthalmological examination revealed a visual acuity of 6/10 in his right eye increasing to 10/10 after correction, and a visual acuity of 10/10 in the left eye. Comment -6/10 and 10/10 is not standard format of expressing acuity 4. Phacoemulsification surgery with placement of an intraocular implant will be considered depending on the evolution of the lens, vision and functional impairment. Comment - Futuristic statement which has not been done so no management of case. 5. The discovery of cataract lesions in a subject with hypoparathyroidism is an indication of severity of the disease Comment - 'Discovery of cataract' a questionable word 6. Papillary edema: Much less often reported, papillary edema appears mainly in children and is observed in both hypo- and pseudo-hypoparathyroidism Comment - The term is papiloedema</p> | |
| Minor REVISION comments | | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
