Manuscript Number:	Ms_AJRRU_76828
Title of the Manuscript:	Meato cutaneous fistula after tubularized incised plate(TIP) repair- An unusual delayed complication
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Thanks for submitting the unique scenario. Photographs are clear, case presentation is precise & accurate. My point for this paper is there is no mention of experiences of other researchers in this regard, after preputioplasty, after TIP with preputioplasty. A more logical explanation for the formation this complication would be welcome.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
