PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Title 2. A systematic review of 4,473 men aimed at determining the best treatment modality for varicocele concluded that open inguinal or sub-inguinal techniques of varicocelectomy resulted to better outcomes with fewer complications compared to laparoscopic procedure or radiological embolisation. 3. At results 4. Histology of the specimen sent for histological evaluation following surgery was confirmatory for varicoceles 5. More than 8 references out of 15 were older than 6 years must be replaced by new one.	1. inguinal varicocelectomy not varicocelectomy alone 2. if this a fact why you are doing this study trying to prove that. 3. You did not mention the way of data analysis and presentation 4. Why histopathology was taken to prove what?	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
