Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. Why to display the same results in graph as well as in table? use either graph or table. Any one is sufficient. 2. REFERENCES: Not in a propre order. Ref 30 in the Introduction part and not cited anywhere else? Please arrange the refernce properly. 3. The study highlights the efficacy of " Panchagavya " which is an ancient tradition, used in some parts of India. This ancient concept should be carefully evaluated in the light of modern medical science and can be utilized partially if found suitable. How you can relate to this study? Please explain. 4. Pls insert the details of statistics test as you have mentioned about P value. 5. How many times the activity test has been done... duplicate or triplicate.....Without that how you can find average/ SD and P value ie., statistics. 6. What is the concentration of diclofenac used....the positive control? Without mentioning the concentration of diclofenac how will you comapre the activity of the extracts? 7. All the extracts are suspended/soluble in DMSO? 8. Preparation of the extracts: Its incomplete. After boiling how the extract collected. Protocol is missing? 9. What is the(temperature) storage conditions of the extract? 10. Pls mention the season of collection of plant material because the active constotueents may vary depends on the season as you discussed. 11. Follow the same style for the word in-vitro, anti microbial. Italics? hypen in between?. In each place its in different style throughout the manuscript. Uniformity is missing 12. Major English language correction is needed. Its compulsory 	
Minor REVISION comments	Commented in the manuscript as track change format	
Optional/General comments	Commented in the manuscript as track change format
