

Review Form 1.6

Journal Name:	Asian Plant Research Journal
Manuscript Number:	Ms_APRJ_81182
Title of the Manuscript:	Natural Mycorrhization, Mineral Uptake, Total Polyphenols and Total Flavonoids of Oat as Affected by Tillage Practices under Rainfed Rained Conditions
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalaprij.com/index.php/APRJ/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The purpose of the investigation was to justify the Effects of Conventional tillage and Non tillage practices on soil physicochemical properties but the report did not answer the statement of problem. Kindly review the report to exact clarification of the research findings. Also, justify the report by reflecting the reason(s) for the occurrences.	
Minor REVISION comments	The report should be reviewed by all authors to ensure all activities were properly recorded and interpreted. This will allow deletion of conflicting statements.	
Optional/General comments	The investigation had industrial relevance to food security but the interpretation of the findings was not properly related.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
