PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The aim of the manuscript was to investigate the nutritional profile of leafy vegetables (Acalypha ciliata, Celosia trygina, Cleome gynandra, Solanum nigrum and Sesammum radiatum) in the diet of the Marahouet population. The intake of vegetables, especially leafy ones, has a significant impact on food, as it is a source of essential micronutrients for human health. In the Marahouet region, leafy vegetables are usually added to the diet in the form of salads or sauces. To date, its nutritional profile has not yet been investigated. This highlights the importance of this study.</p> <p>Overall, the manuscript is relevant for publication. The introduction is well written, the material and methods are adequate, the results and discussion appropriate, as well as the conclusion. However, before recommending it to publication. I suggest that some changes be made.</p> <p>Keywords: Avoid using keywords that are already present in the title of the manuscript.</p> <p>Figure 1. I suggest you remove the abbreviations (AC, CT, CG, SN, SR) from the scientific names of the plants and organize the images by letters (A, B, C, D, E). Scientific names may be present in the figure legend. Standardize the size and dpi of images.</p> <p>Tables 1 and 2. Why are some values highlighted in bold? What does it mean?</p> <p>Some comments and observations were made in the manuscript.</p>	
Minor REVISION comments		
Optional/General comments
