Manuscript Number:	Ms_ARJA_88397
Title of the Manuscript:	CARROT PRODUCTIVITY UNDER VARIOUS LEVELS OF IRRIGATION
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarja.com/index.php/ARJA/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The study was well conducted, had an adequate number of repetitions and presented consistent data. However, to improve the presentation and discussion of the data I suggest to the authors: <ul style="list-style-type: none"><li>- Show the analysis of variance with the factors and their interactions (*, ns). Also, I would recommend considering the sowing seasons as a factor in the analysis of variance.</li><li>- I recommend showing the climatic data in the two sowing seasons. For example in graphics.</li><li>- Reduce the number of tables by grouping the data.</li><li>- Check other comments in the text</li></ul>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
