PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This article is original and scientifically very contributive. In order to give more scope to this work, I advise the author to further develop and exploit the results. At the level of the abstract, the author must clearly state the results presented in order to summarize the study carried out and to identify the importance.	
Minor REVISION comments	In the MATHEMATICAL MODEL FORMULATION AND ASSUMPTIONS part, it will be more important to highlight the equations (not to put the equations directly in the paragraphs) to facilitate their analysis. (see example) This same adjustment can be made on most equations inserted in paragraphs.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
