

Review Form 1.6

Journal Name:	Cardiology and Angiology: An International Journal
Manuscript Number:	Ms_CA_78290
Title of the Manuscript:	Association of Epicardial Adipose Tissue Thickness with Left Atrial Size and Atrial Fibrillation.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalca.com/index.php/CA/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The Introduction should be clear on the purpose of the study. Table 4. E/E is not defined. This is a straight forward study and the outcome is already known. The author discussed the findings in relation to other similar studies. This is good but I would have expected the author to discuss the proposals in literature to explain the risk of increased epicardial adipose tissue and how it is related to atrial fibrillation.	
Minor REVISION comments		
Optional/General comments	There are some typographical errors.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
