

Review Form 1.6

Journal Name:	Cardiology and Angiology: An International Journal
Manuscript Number:	Ms_CA_83233
Title of the Manuscript:	CHA2DS2-VASc-HSF Score as a Predictor of Severity of Coronary Artery Disease in Patients Undergoing Coronary Angiography
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamr.com/index.php/JAMMR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This is generally a well-written and comprehensive article that aims to determine the CHA2DS2-VASc-HSF score as a predictor of severity of coronary artery disease in patients undergoing coronary angiography. The article is well-structured, very interesting and the results are presented in an appropriate manner, being clear and transparent. The statistical analysis is also well done. I consider that the study is valuable and sound and can be published after some minor revisions. I consider that the study would benefit enormously by English editing and reviewing of the missing aspects from the text and also the references.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
