

Review Form 1.6

Journal Name:	Cardiology and Angiology: An International Journal
Manuscript Number:	Ms_CA_85562
Title of the Manuscript:	Evaluation of Lipid profile and some Renal Parameters in some selected ethnic population with fat-mass and obesity-associated gene (FTO) variants in Niger Delta, Nigeria
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalca.com/index.php/CA/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The results of the paper focus on the measurements of lipid parameters but do not show any genetic data from the subjects included in the study. I consider very important to characterize each individual FTO gene in order to support the paper conclusion.	
Minor REVISION comments	Some abbreviations are not explained in the text. Be careful with the orthography.	
Optional/General comments	I suggest focussing more on the results presented on the paper and to reduce the amount of information coming from other studies. This will help to clarify the conclusions that we can get from the data obtained.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
