PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">● There are some unnatural parts in the English language. I would appreciate it if you could correct it again by a native speaker.● The word thrombus and the word hematoma appear in the text, and I have a feeling they refer to the same event. Am I misunderstanding?● Page 3, 2nd paragraph in the discussion section. You mentioned "after that increased permeability and spasm of myocardial vessels which lead to rupture and finally thrombus formation occurred". Please explain what part of the laboratory information in the text makes this possible.● Although only a cine image of the cardiac MRI was presented, it is an important image for this case report, so I would like you to present and describe other sequences of images as well.	
Minor REVISION comments	<ul style="list-style-type: none">● The texts in the figure are too small to read.	
Optional/General comments	I thank you for allowing me to review this valuable case report. After reviewing the contents, I have the following comments, which I would appreciate if you could refer to them and correct them.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
