PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Although the sample size of the study is small, this shows the simple and easily performed parameters of assessing the prognosis of this common and killing illness. Secondly if these parameters are proved in large randomised trials may prove of significant clinical utility in the poor and developing world. The study is well designed and conducted having no ethical issues and devoid of conflict of interest.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
