PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> • Discussion is very shallow. Author is advised to reconsider it; Petal(2012) is repeatedly used. • Table number should be inserted at the end of each result. That will be very easy to cross check. Now days, Table numbers are also written at the end of the result inside brackets as (Table 1). • Author is advised to correct the comments given in the track change. 	
Minor REVISION comments	<ul style="list-style-type: none"> • Abstracts: <ul style="list-style-type: none"> - Briefly describe how the study was performed and which statistical tests were being used. - Briefly describe the main findings. Only provide net result findings. • Introduction <ul style="list-style-type: none"> - Long paragraph with a lot of ideas. Author is advised to reconsider it - introduce the morphology of the soybean • Result <ul style="list-style-type: none"> - Theoretical description of Table 4.4and Table 4.6 is confusing. • Conclusions <ul style="list-style-type: none"> - The conclusions look like similar to abstract section. Please revise it some of the points. 	
Optional/General comments	<ul style="list-style-type: none"> - Provide DOI or URL of the listed references. - It will be interesting to analyze damaged or infestation level of these pests from highest to lowest in terms of figure.
