PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	That's a very well written paper. I recommend more explanation about the criteria of choosing the source used	
Minor REVISION comments	I suggest the author give a bit more explanation about the importance of statistics in matters like these. In my very particular view, as an international academic paper, this could reach non-academic people or young students could be inspired with your paper.	
Optional/General comments
