PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Because this is a review article, it is encouraged to include discussion of other published manuscripts in the area. The article's introduction is fantastic. It would be preferable if the author added sufficient citations in the latter section, which was lacking in relevant scholarly support. As a result, it is advised that certain literature citations be included to make the piece more successful.	
Minor REVISION comments	Our land is under threat as a result of increased chemical usage. We're trying to find a solution. This article is demanding from that perspective. From an Indian viewpoint, the authors covered a wide range of topics related to natural farming, including its scope, relevance, and problems. If at all feasible, I would suggest including some global perspectives on the strategy's benefits/success.	
Optional/General comments	To sum up, this manuscript is an encouraging one. It focused a critical issue in agricultural field as natural farming is a fundamental to ensure sustainable agricultural development. However, a few modest additions might improve the article's value and utility to the scientific community.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
