PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Overall, a good written journal. A good elaboration on the Introduction and Literature Review. However, several revisions need to be done: 1. Elaborate the process of the analysis. Explanations are not detail out. Suggest to draw a figure on the process of the analysis so that it is easy to understand. 2. Statement in paragraph 3 under 3 Result and Discussion is a statement without citation. State the source of "However, many researchers who are willing to assume symmetry in the univariate distribution might be unfortunately unwilling to replace the t-test with the Wilcoxon signed-rank test for small sample sizes without examining the data first".	
Minor REVISION comments	1. The word "moments" in page 2 is in different font.	
Optional/General comments	This is such a good paper. However, the methods discussed are not clear enough. Readers may have difficulties to understand the method done.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
