<b>Compulsory</b> REVISION comments	The article "Isolation and screening of biosurfactant producing lactic acid bacteria from traditional Indian cereal-based fermented food "Seera." is interesting. However, it would be even better if the following issues are taken into account: 1. The article is not written according to the rules of academic writing (for example - ABSTRACT is usually written as a "story" and not as paragraphs) 2. The article does not sufficiently describe the methodology 3. Add more details on methods and materials that are required and need a reference to the statistical processing of data. Several experiments (repetitions) and statistics of the results are not straightforward. 4. In FIG. 1 and FIG. 2, What do the parentheses mean? 5. FIG6 should indicate standard deviation and statistics 6. Extending the conclusions – what are the additional topics that are required for review. 7. This article must be edited in English	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
