### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalejmp.com/index.php/EJMP/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The chosen field is important from a scientific point of view.  1. The entire article should be checked for minor grammatical errors, punctuation, etc.; 2. For a better understanding of the manuscript, the results and discussions should be separated. The discussions will be elaborated mentioning the related studies and the comparison of the results	
<b>Minor</b> REVISION comments	Minor editing errors	
<b>Optional/General</b> comments	The subject is good, the approach is pragmatic and precise, and the results are clear, well systematized and bring useful information to the pharmaceutical industry. The results are clear. I recommend publishing it after reviewing the manuscript.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
