PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The manuscript is satisfactory. It would have been relevant to include anthropometric assessment of students to better discuss the results. It was also not mentioned whether the work was submitted to the Research Ethics Committee before being conducted. I leave as suggestions to remove the information "0% of the adolescent girls never consumed x, y, z", because that is unnecessary. Also, in Table 3 - 00 (0.00) change for 0 or "none".	
Optional/General comments
