PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	The study is very complete and interesting, since they have shown that lactic acid bacteria, isolated from plant foods, have probiotic properties. For Argentina, only lactic bacteria isolated from the human intestine and that reach the intestine viable are considered probiotics. Therefore, consuming beneficial lactic acid bacteria, of plant origin, is very interesting, especially for strict vegans.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
