

Review Form 1.6

| | |
|--------------------------|---|
| Journal Name: | International Astronomy and Astrophysics Research Journal |
| Manuscript Number: | Ms_IAARJ_79041 |
| Title of the Manuscript: | Dark matter in the planetary system |
| Type of the Article | |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaliaarj.com/index.php/IAARJ/editorial-policy>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | Dark matter and dark energy are very much inter-related. One can not specify properties of dark matter without considering dark energy into account. Manuscript must take dark energy into account before generalizing properties of dark matter. | |
| Minor REVISION comments | | |
| Optional/General comments | All given equations may make sense once author will modify them for dark energy too. For head start, I suggest the author to look deep into the properties of gravitational waves. Best of luck. | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) | |
