<b>Compulsory</b> REVISION comments	The ms is clearly "scientifically robust and technically sound".	
<b>Minor</b> REVISION comments	It is now common to write 'back hole' in place of "blackhole"	
<b>Optional/General</b> comments	Of course, personally, I totally disagree with the key positions expressed in the article; but, I agree that they reflect the mainstream view; itself, a sad product of cumulative errors over the course of the history of modern physical research. The conclusion, "dark energy constitutes d driving parameter behind cosmic evolution" is in accord with the mainstream notion, but the view obscures the hard facts of the matter – ref.
