### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	This is a descriptive project that requires a presentation of the prevalence of malaria in the study population, in this population, how many individuals correspond to blood group O, A, B or AB. These blood groups that "susceptibility" or biological impact could have in the infection of COVID-19 and, what advantage in the treatment of COVID-19 could generate. In addition to the malaria treatment, which I suppose the patients should be receiving, an important point that the authors do not mention or describe.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
