

Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_69691
Title of the Manuscript:	Tumor Necrosis Factor Receptor II Gene Polymorphism and Association with Plasmodium falciparum Malaria in Badagry, Lagos, Nigeria
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments The authors themselves had excellent description and conclusion	Comparing between controls and malaria cases, the frequencies of wild-type were highest in the controls (85.70%) compared to the variant-type (14.30%), while the frequencies of the mutant-type were lower in the malaria cases (5.30%). This study indicates that polymorphism on exon 6 of <i>tntf</i> II gene was not associated with susceptibility or resistance to malaria infection in Badagry, Nigeria. Further researches with a larger sample size are needed to clarify this subject.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
