

Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_77474
Title of the Manuscript:	Proximate analysis and antinutritional factors of water melon seeds (citrulluslenatus).
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Although the description of the working methods is correct, their presentation in detail is not necessary when working with standardized methods. Only if the method has been modified should this be indicated. It would be important to mention the limits of the antinutritive factors to which the bibliographic source also referred.</p> <p>The way the samples are collected and their number is important, especially since each sample must have a parallel sample.</p> <p>The expression ". It also contains a moderate amount of some of the anti nutritional factors indicating that the citrulluslanatus has anti nutritional benefit in humans and animals" is not relevant because antinutritive factors do not have beneficial effects. It can be said that their presence within the allowed limits allows their use in food.</p>	
Minor REVISION comments	The bibliography should be richer and more current.	
Optional/General comments		

Review Form 1.6

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
