

Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_86918
Title of the Manuscript:	Comparative analysis of protein in selected infant formula using dye-binding and formol methods
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It was made a revision of the use of milk and the protein content of some infant milk formula in the humans feeding. The purpose was to compare 2 methos of analysis of protein in two selected baby milk (Peak baby and My boy). It was concluded that the analysis of protein content in the two selected baby milk using Dye-binding and Formol method carried out, there was no significant difference between the values obtained from Formol method for my boy milk. Compared to the reference (factory) showed no significant difference.	
Minor REVISION comments	The article was well written. I only marked in yellow the words "steineggar" and "myboy" on pages 5 and 6 because they should be written with a capital letter at the beginning.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> No, there Are not ethical issues in this manuscript?
