

Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_89206
Title of the Manuscript:	PPRELIMINARY EVALUATION OF ANTI-TRYPANOSOME IMPACT OF METHANOL, ALKALOID AND FLAVONOID EXTRACTS OF SARCOCEPHALUS LATIFOLIUS IN T. BRUCEI INFECTED MICE.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> Spelling mistake in the first word of the title of a manuscript is not desirable. This is disappointing for the reviewer. Please edit. Which gender of mice were used? and why that gender was chosen? "D100 is the minimum dose with death" or with 100% death? Table 2b, is this the motility of mice or the motility of parasite? How did the author measure the distance for motility? All the figure legends need to be described in detail. Please define the Y axis in all the bar diagrams. Authors claims "This indicates that the extracts did not exert the desired effect of eliminating the parasite. However, there is prospect of the extract being trypanostatic suggesting that the extracts hindered the reproduction of the parasite." How are the authors claiming that? the numbers of parasites are still increasing in figure 1. For citing a paper inside the text, either finish the sentence and at the end of the sentence put the reference. Or mention the name of the author of the paper to cite the paper. Accolading to (the number of the reference)" is not proper way to cite a paper. How the author measured motility of the parasite? and what is the clinical significance of motility of the parasite? 	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
